CARE AND CARE RESEARCH
30 YEARS ON?
VISIONS OF THE FUTURE.

Elizabeth Beattie
Some of the Drivers

- The tyranny of history in the care of people living with dementia
- The demographic imperative
- The reclaiming of the experience – the growth in dementia advocacy
- Moving beyond the medical model
Major Challenges to the Provision of Excellent, Evidence-based Care

- The extent and depth of the essential changes needed to transform care
- WORKFORCE capacity and valuing
- Development of the evidence base for care and timely, effective, sustainable translation of knowledge into practice
- Education and Training
  - Comparable investment in care-focused research opportunities and the education of care researchers
- Ageism, stigma and social marginalization.
