Cost of dementia to the UK

Dementia costs the UK £26.3 billion a year

That’s enough to pay the annual energy bill of every household in the country.

Total cost
£26.3bn

£11.6bn
Unpaid care

£4.3bn
Health care

£4.5bn
State social care

£5.8bn
Individual social care

£0.1bn
Other costs
Growing demand vs austerity

- There will be over 1 million people in the UK with dementia by 2021
- Right to post-diagnosis support
- Equality with other conditions

- The NHS budget increase is equivalent to an average annual increase of just 0.9%
- Local authorities have already reduced expenditure on adult social care by £4.6 billion since 2010
- Local authorities will see an overall cut to their budgets of around 55% by 2020
- Increase in self funders

Evidence of what works and value for money is more important than ever

Diagnosis and post-diagnosis support – what works

Case study: Chester, Cheshire

• Different healthcare professionals working together delivering joined-up post-diagnostic support in a series of sessions

  – Consultants from the memory clinic
  – Psychiatrists
  – Occupational Therapists
  – Dementia Adviser

‘Together, the four sessions offer a range of advice. Practical advice can be taken away to be digested or taken up later; emotional and peer support is provided alongside learning about the disease, which is intended to offer explanation and clarity.’
Supporting Diagnosis project

• 25 CCGs were supported to improve diagnosis and post-diagnosis support
• Each approach was developed locally, in partnership with the CCG
• A Dementia Adviser increased post-diagnosis support capacity, or an Information Worker helped to raise awareness in the community

Outcomes
• Diagnosis rates in areas involved in the project for six months improved on average by 6.4%, compared to an average across all CCGs (over six months) of 3.1%
• A new partnership model of supporting diagnosis has been developed

@george_mcnamara
Cost effectiveness of Dementia Advisers

Dementia Advisers
• Specialist one to one support
• Information and signposting
• Supporting people to live well and maintain independence

New Economics Foundation Consulting
• Social cost benefit analysis
• Bexley and West Lancashire
Cost effectiveness of Dementia Advisers

Key savings

People with dementia
• Building peer networks
• Vitality
• Reduced anxiety

Carers
• Building peer networks
• Knowledge and information
• Reduced anxiety

Savings to the state
• Reduced cost to mental health services through avoided carer breakdown
Person-centred vs generic support

- Care and support for people with dementia needs to be person-centred
- 70% of people with dementia have co and multi morbidities
- If you get it right for dementia, you benefit the wider population of the elderly

@george_mcnamara
Where next?

- Necessary to show value for money
- Move away from tradition methods of calculating cost effectiveness
- Focus on payment by results e.g. social impact bonds
- Greater involvement of people with dementia
Thank you
