Global Solutions for a Global Epidemic
What is Alzheimer’s Disease International?
Alzheimer’s Disease International is the international federation of more than 80 Alzheimer associations throughout the world. From Argentina to India, the USA and South Africa, we believe that the key to winning the fight against dementia lies in a unique combination of global solutions and local knowledge. As such, we work locally, by empowering Alzheimer associations to promote and offer care and support for people living with dementia and their care partners, and globally to focus attention on dementia and campaign for policy changes around the world.

Our work …

**World Alzheimer’s Month**
An international campaign each September to raise awareness and challenge stigma around the world. 21 September is World Alzheimer’s Day.

**Advocacy and campaigning**
ADI is behind the first international network of advocacy on dementia.

**Annual International Conference**
ADI hosts the longest-running annual international conference on dementia.

**Alzheimer University**
A series of workshops aimed at helping staff and volunteers of Alzheimer associations build and strengthen capacity and develop their organisations.

**Train the Trainers**
Our training programme aimed at improving the knowledge and skills of family care partners and care professionals.

**Twinning Programme**
A formal, two-way partnership between two Alzheimer associations.

**The 10/66 Dementia Research Group**
This unique network of researchers aims to redress the imbalance between population-based research in high income and low and middle-income countries.
